Work Wear
Markings and Sizes Information

DIN
DIN 32763

Deutsches Institut für Normung

Water repellence properties, aqueous/oily stains and chemical agents.
It increases customer protection and durability of the uniform.

Chemical Agents Repellence: Hydrochloric Acid 32%, Nitric Acid 65%, Sulphuric Acid 24% & Sodium Hydroxide 40%.

Da Gama finish W4

NFPA
NFPA 1975
NFPA 70E
NFPA 2112

National Fire Protection Association
The authority on fire, electrical and building safety
Standard for firefighter station wear
Standard for electrical safety in the workplace
Standard on flame resistant garments for protection of industrial personnel

ASTM
ASTM F1506
ATPV

American Society for Testing and Materials

Standard for worker apparel as protection from electric arc exposure.

Arc Thermal Performance Value (ATPV) refers to the minimum incident energy (in calories per centimeter squared - cal/m2) that protective equipment can be exposed to and prevent the onset of a second-degree burn.

TRIPLE STITCH
The seams are sewn using a three needle head sewing machine that closes and triple stiches the garment seams.

YKK stands for Yoshida Kogyo Kabushikikaisha - a global manufacturer of zips, snaps & buttons, textiles and plastics. YKK offers fastening advice, products and services. YKK works together with customers to develop new solutions and fastening processes. Established in 1934, YKK currently employs 40000 people worldwide and is represented by 118 affiliated companies in 70 countries. Every component of every product they manufacture uses the most advanced methods to the highest technical and ethical standards. This attention to detail has changed the world of fasteners and has allowed YKK to be “One step ahead”.

COMFI FIT

Designing patterns that allow a seamless fit and easy movement at all the stress points, whilst optimising fabric ratings for a comfortable and affordable garment.
